### Roadkill cafe

Over 200 dead crows were found on the M4. The cause of death appeared to be from vehicular impacts. During analysis it was noted that varying colours of paints appeared on the bird's beaks and claws. By analysing these paint residues it was found that 98% of the crows had been killed by impact with motorbikes, while only 2% were killed by cars.

An Ornithological Behaviourist was hired to determine if there was a cause for the disproportionate percentages of motorbike kills versus car kills. He concluded that when crows eat road kill, they always have a look-out crow to warn of danger. They discovered that while all the lookout crows could shout "Cah", not a single one could shout "bike"
