New Hosting server Update

We have been up on the new hosting server now for 2 1/2 days. It seems a lot faster to me. It is running at 100% no downtime. The pictures are not working in the articles and links, I have a ticket in to the software people to try and get that fixed. Some of the maintenance programing is noit very good (link checker) but if the server is fast and stable, I guess I can live with that.
