Pending Server Change

This virtual private server, which is used to host this website, will no longer be available after January 2024. In order to check for broken links, I will continue to make use of the new tool I found. I plan to migrate the website to a new platform in the fall to see how well it does. Once I've confirmed that it functions well, I will test the website on a new server. The website might be migrated before the end of the year, depending on how reliable the platform is. You can be of assistance by providing error reports, which will allow information on individual links to be updated.
