Backpedaling about Gender in Britain

A recent article in The Atlantic¹ by Helen Lewis made the bold claim that “The Gender War Is Over in Britain.” An overstatement, to be sure, but not entirely unwarranted. Keir Starmer, head of the Labour Party, recently led his party away from full support of radical gender ideology. This was a notable shift for the United Kingdom's largest left-wing party, which had previously encouraged radical elements of trans activism and stood aside as feminists were canceled for resisting the new orthodoxy. The shift, which was quietly announced to the public, made “three big declarations.”
