A Formula for Church Planting

<https://cbcmcalester.com/2015/06/21/a-formula-for-church-planting/>

In the mid-1700s, a pastor by the name of Shubal Stearns led the Sandy Creek Baptist Church in North Carolina. During the Separate Baptist Revival led by Bro. Stearns, 17 men were ordained and planted churches. Through those early church planting efforts, it is possible to trace in one generation 500 Baptist church plants back to Sandy Creek Baptist Church and in two generations over 1,000 Baptist church plants were traced back to this church!
